

Turtle protection through satellite trackers: TUI Care Foundation and conservation organisation ARCHELON release sea turtle in Greece

- *TUI Turtle Aid Greece tracks rehabilitated sea turtle's movements in the Mediterranean*
- *Satellite tracking provides essential data on sea turtle behaviour, supporting marine conservation efforts*
- *Triton's release highlights TUI Care Foundation's commitment to safeguarding sea turtles and supporting sustainable tourism*

Berlin, 12th November 2024. *The TUI Care Foundation has released the rescued and rehabilitated loggerhead sea turtle Triton, in partnership with ARCHELON, The Sea Turtle Protection Society of Greece. Triton was released back into the Mediterranean Sea with a satellite transmitter after several months of rehabilitation at ARCHELON's Sea Turtle Rescue Centre. As part of the TUI Turtle Aid programme, the initiative aims to contribute valuable insights into sea turtle behaviour and helps conservation efforts that support the long-term health of sea turtles and their habitats.*

Every year, ARCHELON's Sea Turtle Rescue Centre cares for around 70 injured or ill sea turtles, many of which are affected by trauma resulting from boat collisions or other human activities. Triton, one of their recent patients, was found in 2023 on a Cycladic beach in the Aegean with significant head injuries. After extensive care and rehabilitation at the Sea Turtle Rescue Centre, Triton has now returned to the sea with a new mission: to help inform scientific understanding of sea turtle movements and habitat needs.

Triton is the first rehabilitated sea turtle in Greece to be tracked in real time via cutting-edge satellite telemetry. Telemetry gathers, transmits, and assesses data from distant sources through the use of sensors and various devices, enabling automatic data collection and analysis. ARCHELON's researchers in the project are now looking forward to following Triton's journey to better understand how rehabilitated sea turtles adapt behaviorally post-release, as well as to study migration patterns and habitat use.

Eirini Kasimati, ARCHELON's Rescue & Rehabilitation Officer: "We are incredibly excited about this opportunity to learn more about sea turtles and their critical role in marine ecosystems. With the support of the TUI Care Foundation, we can now shed light on the lives of these enigmatic creatures after rehabilitation and work towards ensuring their survival for generations to come."

Alexander Panczuk, Executive Director at the TUI Care Foundation: "The TUI Care Foundation supports the long-term protection of sea turtles by focusing on conservation at critical nesting sites and fostering partnerships that drive local impact. In our partnership with ARCHELON, we're not only rescuing injured turtles like Triton, but also expanding our understanding of their behaviours through tracking. This partnership also allows us to engage local communities and tourists in conservation efforts, strengthening our commitment to sustainable tourism and the preservation of sea turtles."

Named by TUI Group colleagues, Triton is inspired by Greek mythology, where Triton served as a messenger of the sea. The turtle's release offers an opportunity to deepen scientific knowledge while also raising awareness about marine conservation.

Sea turtle tracking is part of the TUI Care Foundation's TUI Turtle Aid programme, which protects endangered and vulnerable sea turtles, especially around nesting beaches. By working with local NGOs and beachfront tourism businesses, it creates turtle friendly beaches and engages tourists by teaching them about turtles and how to protect them. Since its establishment, the TUI Turtle Aid programme has contributed to the protection of over 2 million sea turtles.

Triton's progress can be followed on the TUI Care Foundation's website, where updates on his journey through the Mediterranean will be shared.

About the TUI Care Foundation

Building on the potential of tourism as a force for good, the TUI Care Foundation supports and initiates projects which create new opportunities and contribute to thriving communities in tourism destinations all over the world. Connecting holidaymakers to good causes, it supports education and training opportunities for young people; drives the protection of natural habitats and the marine environment; and helps local communities to thrive sustainably and benefit from tourism. The TUI Care Foundation builds on strong partnerships with local and international organisations to create meaningful and long-lasting impact. The independent charitable organisation was founded by TUI, one of the world's leading tourism businesses, and is based in the Netherlands.

About ARCHELON

ARCHELON is a non-profit organization dedicated to the study and protection of sea turtles and their habitats in Greece. Its activities combine scientific research with volunteer work and aim to activate society for a better and sustainable planet through education and information dissemination. ARCHELON has been systematically recording the nesting activity of the loggerhead sea turtles and protecting their nests on the most important nesting beaches in Greece, every summer since 1983. As a result, ARCHELON's sea turtle monitoring and conservation projects in Zakynthos and Kyparissia Bay rank among the longest-running in the world. The nationwide Sea Turtle Rescue Network was established by ARCHELON in 1991 and has been recording sea turtle strandings with the help of port authorities and citizens ever since. Established in 1994, the ARCHELON Sea Turtle Rescue Centre in Glyfada receives and treats injured sea turtles and carries out educational activities for thousands of students and visitors every year, highlighting sea turtles as a symbol for the protection of marine biodiversity.
