201312-PHL-133, Filipino children who were affected by Typhoon Haiyan took part in a children's consultation session organised by Plan a month after the typhoon hit. Children aged 8-17 were invited to share their experiences and explore the changes in their lives before and after typhoon Haiyan.

201605-PHL-75, 53-year-old Salvador, a fisherman and father of four, almost lost his life during a severe storm last year. Having already survived Typhoon Haiyan, this was another huge blow to him and his family. However, thanks to a savings initiative set up by Plan International for families affected by Typhoon Haiyan, situations like this are not nearly as bad as they used to be.
